DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Haskett et al (US Pat 5,253,682).

The Haskett et al. reference discloses a transportable distribution apparatus comprising a piping system (see manifold in Fig. 13), a valve 47, a pressure regulator 6, a platform 64 (i.e. trailer portion of the truck, see Fig 14) and skid structure (65,66). All functional and introductory statements of intended use have been considered but are deemed not to impose any structure on the claims distinguishable over the device which is further capable of distributing acetylene if desired.

Claims 1-7 are allowed.
